Note:

*) ETAGs coloured in light grey were **not** converted by EOTA into EADs between 2014 and 2018. This is because of the low number of ETAs issued according to these ETAGs and the lack of interest of the concerned manufacturers. If manufacturers wishes to use the ETA route for those products, TABs will check with the manufacturer, if an EAD needs to be developed (Art 21 (1) c Regulation (EU) No 305/2011).

Some EAD titles were slightly modified compared to the ETAG title. This was due to the meanwhile established harmonised language in that product family.

Reference to the EAD master number equals the undated reference to that EAD.

Since 2015 references to EADs were communicated in the series C (information and notices) of the OJEU (last citation of a complete list of EADs in COM Communication 2018/C 417/07 of 2018-11-16⁷). Since 2019 the list of EADs is published in the series L (Legislation) of the OJEU through a COM Implementing Decision.

This is a follow-up of the information given in the meeting of the Advisory Group CPR for Market Surveillance Authorities in November 2018 (AdCo CPR document 24/14/01).
